Announcements

Delivery Associate Recognition Initiatives:

Please leverage the programs below to show appreciation to your drivers. These initiatives are designed to make DAs feel valued for their day-to-day efforts, while helping you coach your team by rewarding behaviors that positively impact your Scorecard metrics.

DSP Driver SWAG Program:

The DSP Swag Program allows top-performing DSPs the ability to earn free swag tokens for their teams. To qualify for Driver Swag your team must score "Fantastic/ Fantastic+" on your weekly scorecard at least 4/6 weeks during 6-week qualification periods, which occur once per quarter. If you qualify, you will receive tokens in your Delivery Recognition Center Account (DRC) account.

Swag Token Qualifying Period: Closed

The Q1 Driver Swag Qualification period is currently closed. If you qualified, tokens will be deposited during the 4th week following the end of the qualification period.

2025 Driver Swag Qualification Periods:

Quarter	Weeks
Q1	WK4-WK9
Q2	WK17-WK22
Q3	WK30-WK35
Q4	WK40-WK45

If you have qualified for Driver Swag in any of the 2024 Qualification periods, you can find your earned tokens in your Delivery Recognition Center (DRC) account once signing up. For any questions about the program, please contact driverswag@amazon.com.

If you have not yet signed up for the DRC, please do so by navigating to the website below, and clicking "DSP Owner Sign-In" --> "Sign Up"

[Delivery Recognition Center](#)

Delivery Associate Recognition Program:

This program awards top performers, recognizes extraordinary acts, and celebrates key milestones through three pillars:

Frontrunner Awards: Highlights high-performing DAs each month based on Scorecard performance. DSPs will receive one Frontrunner Award Card per month to provide to the DA they would like to award as the Frontrunner winner.

Extra Mile Awards: Enables you to recognize your DAs that have gone above and beyond by submitting such actions via the Extra Mile Awards intake on the Support Hub (Select Delivery Associate Recognition).

Milestone Awards: Aids in celebrating tenure achievements with high quality enamel pins.

For more information, please contact your OTR DA Engagement Lead.

Questions?

- Discuss with your On-Road Area Manager.
- Leverage the resources in the links below:
 - [Access Logistics Support Central](#)
 - [Delivery Excellence Performance Program Guide](#)
 - [Data Disputes Resource Guide](#)

Netradyne Portal Q&A is offered on Fridays from 2:00 pm to 3:15pm. Please use the below link to join:

<https://chime.aws/7889874554>

Scorecard Publishing SLA is Wednesday at noon PST. If we will be delayed past that time, we will communicate it via a portal banner.

Recommended Focus Areas

1. Customer Delivery Feedback

2. Tenured Workforce

3. Delivery Completion Rate

Improving Customer Delivery Feedback, Tenured Workforce, and Delivery Completion Rate scores would improve your Overall Standing.

Current Week Tips

1. Provide visibility of the CDF report to DAs to show them where they stand and what areas they should focus on for improvement.
2. DAs who receive consistent full-time work stay in the role longer
3. Emphasize that when drivers resolve a delivery issue (i.e. find an access code, etc.) store the information in the Rabbit app to help resolve future deliveries to that address.

*The On-Road Safety Score is a rating partly derived from third party metrics. The third party metrics provide indicators of safe driving behaviors available to us today from third party services.

Appendix A: Metric Definitions and Weightings

Metric

Weighting (this week's Scorecard)

Overall Standing

100%

Safety and Compliance

The Safety and Compliance category score is a weighted average of your Safety Score and Compliance Score. If your Safety score is marked as "Coming Soon" then your Safety and Compliance category score will remain "Coming Soon". Note: If you don't yet have an On-Road Safety score, we will re-distribute the Safety weightage of your overall standing over all other Scorecard metrics in proportion to their individual weights.

- i **On-Road Safety Score:** Weighted average of Safe Driving, Seatbelt Off Rate, Speeding Event Rate, Distractions Rate, Following Distance Rate, and Sign/Signal Violations Rate. On-Road Safety Score is a rating partly derived from third party metrics. The third party metrics provide indicators of safe driving behaviors available to us today from third party services. 42.5%
- i **Safe Driving Metric:** This metric is calculated using the eDriving Mentor FICO® score, which is a composite potential indicator of a driver's safe driving behavior. The metric is measured by analyzing indicators of how your drivers operate their vehicles, such as Harsh Acceleration, Braking, Cornering, Cellphone Distraction and Speeding. The metric is a weighted average of all driver's eDriving Mentor FICO® scores at the end of the week, converted to a 0.00 - 4.00 score where a higher score is better. Safe Driving Scores of at least 3.00 (equivalent to a FICO® score of at least 800 for a DSP) will earn Fantastic. You can see your DSP FICO® score, and details on how to improve, in the eDriving Mentor Portal (see link in cover page). This is a 3rd party metric and is a potential indicator of DA safe driving behavior. 2.1%
- i **Speeding Event Rate:** It is critical that your Delivery Associates (DAs) travel within posted speed limits for their safety and the safety of the communities they serve. The Speeding Event Rate metric is the average number of speeding instances incurred by a DA per route. A speeding instance is speeding 10 Miles per Hour (MPH) or more for roughly one city block. Any instance of speeding is unacceptable and we've designed this metric to enable you to focus on coaching DAs with the riskiest speeding behaviors. 9.9%
- i **Seatbelt Off Rate:** It is critical that your Delivery Associates (DAs) and Helpers wear their seatbelt while in moving vehicles. The Seatbelt-Off Rate metric measures the number of 'seatbelt-off instances' incurred by the driver or any passengers per 100 trips. A seatbelt-off instance occurs whenever the vehicle is in motion and the driver or passenger does not have their seatbelt fastened or is not properly wearing their seatbelt. Seatbelt events should only trigger once between vehicle stops. 9.9%
- i **Sign/Signal Violations Rate:** It is critical that your Delivery Associates (DAs) follow traffic regulations for their safety and the safety of the communities they serve. The Sign/Signal Violations Rate measures how well your DAs adhere to posted road signs and traffic signals. We're currently including stop sign violations, which is any time a DA drives past/through a stop sign without coming to a full stop, illegal U-turns, which measure any time a DA makes a U-turn when a "No U-Turn sign" is present, and stop light violations, which is triggered any time a DA drives through an intersection while the light is red. In the measurement of this metric, a stop light violation will count 10 times to every one stop sign violation or illegal u-turn, since stop light violations can be particularly dangerous. In the new metric, your DSP weekly score is the sum of all stop sign violation events, illegal U-turns, and stop light violation events (which again, are weighted at 10 times stop sign violations) divided by the number of trips. This will show on your DSP Scorecard as XX events per 100 trips to make it easier to interpret. 9.9%
- i **Distractions Rate:** It is critical that your Delivery Associates (DAs) are not distracted while driving for their safety and the safety of the communities they serve. The Distractions Rate metric measures your team's performance on distracted driving. Netradyne captures 3 types of distraction based on video evidence, including when a DA is looking down, looking at their phone, or talking on their phone while driving. Each time a DA is driving while distracted, Netradyne will register one event. Your DSP weekly score is the sum of all distraction events divided by the total number of trips. This will show on your DSP Scorecard as XX events per 100 trips to make it easier to interpret. 6.4%
- i **Following Distance Rate:** It is critical that your Delivery Associates (DAs) leave enough following distance between their vehicle and the vehicle in front of them for their safety and the safety of the communities they serve. The Following Distance Rate measures how DSPs are performing in terms of leaving enough following distance from the vehicle in front. Netradyne will create a Following Distance event if a DA has 0.6 seconds or less following distance from the vehicle in front. Each time a DA doesn't leave enough following distance, Netradyne registers 1 event, and the DSP weekly score is the sum of all following distance events divided by the number of trips. This will show on your DSP Scorecard as XX events per 100 trips to make it easier to interpret. For example, if a DSP incurred 10 Following Distance Events during 200 trips in a week, then the Following Distance Rate is 5 events per 100 trips (10 events per 200 trips is the same as 5 events per 100 trips). 4.3%
- i **Working Device:** The Working Device metric measures defects in Netradyne coverage on trips and is treated as a binary safety compliance metric in the Scorecard. It is calculated as a defects per 100 trips metric, in which the defect rate represents the number of trips made without functional Netradyne technology out of all trips completed in a week. You are required to earn a 'Compliant' status to be eligible for an Overall Standing of 'Fantastic' or 'Fantastic Plus'.

Compliance

- i **Breach of Contract:** Breach of Contract indicates whether your organization has been issued a Breach of Contract (BOC) Notice due to a breach of the DSP Program Agreement or Program Policies. Receiving a BOC Notice automatically makes your Compliance score and Overall Standing "Poor" while the notice is in effect. If you have a BOC Notice, or are unable to locate your BOC, please email dsp-na-boc-monitoring@amazon.com.
- i **Comprehensive Audit Score:** The Comprehensive Audit Score (CAS) is a measurement of DSP/Driver Eligibility, DSP Operations, Safety, Wages & Benefits, DSP Management, and Working Hours (all measuring compliance to DSP Program Agreements and Policies). Maintaining Amazon's compliance standards is required and the CAS provides a view of your weekly state of compliance. A 'Compliant' status is earned on a weekly basis by: 1) achieving 92.00% or higher on the (typically annual) Compliance Audit, when applicable, 2) incur no more than one Wages & Benefits CAP, and 3) remediate all open CAPs issued by TRC. You are required to earn a 'Compliant' status to be eligible for an Overall Standing of 'Fantastic' or 'Fantastic Plus'.

Delivery Quality

Weighted average of Delivery Completion Rate, Delivery Success Behaviors, Photo-On-Delivery Acceptance Rate, and Customer Delivery Experience Metrics.

- i **Delivery Completion Rate (DCR):** The share of packages dispatched to the DA which are delivered to the customer (and not returned to the station). Thresholds are set at the station level. DSPs and DAs who earn Fantastic for DCR typically achieve a DCR of greater than 99.0%, although the threshold varies by +/- 0.5% due to differences in historical delivery difficulty levels. 11.3%
- i **Delivery Success Behaviors (DSB):** Number of packages marked delivered by DAs but not received by customers (DNR) where the DA did not adhere to best practice while completing the delivery. This metric is calculated as a defect per million opportunities (DPMO) driven by five DA-controllable behaviors: Simultaneous Deliveries, Delivered >50 meters, Inaccurate Scan Usage - Unattended Deliveries, Inaccurate Scan Usage 11.3%

- Attended Deliveries, and No-POD deliveries.

<i>i</i> Photo-on-Delivery Acceptance Rate (POD): The number of usable (i.e. presentable to the customer) POD (Photo-on-delivery) photos taken, divided by total POD opportunities. DSPs and DAs who earn Fantastic for POD Acceptance Rate typically achieve 98.0% or better.	2.8%
Customer Delivery Experience: Weighted average of Customer Escalations DPMO and Customer Delivery Feedback. If you don't yet have a CDF metric, we will calculate your Customer Delivery Experience score only based on Customer Escalations DPMO.	17.0%
<i>i</i> Customer Delivery Feedback DPMO: The CDF metric is a measurement of the customer feedback received after packages are delivered by the Delivery Associates (DAs). The metric is a ratio that accounts for negative feedback in relation to the total deliveries made by the DSP in the same week. Refer to the metric deep dive guide for more details.	5.7%
<i>i</i> Customer Escalation Defect DPMO: The frequency at which DAs incur customer escalations, on a per-million opportunities (DPMO) basis. Violations are triple-weighted, Multiple Defect Offboardings (MDOs) are double weighted, and Defects are single-weighted. Customer Escalation Defect DPMO is a 2-week delayed metric because we only hold your organization accountable for escalations that have not been overturned by appeals. DSPs who earn Fantastic for Customer Escalations Defect DPMO typically achieve a "0" DPMO for the week.	11.3%

Pickup Quality

<i>i</i> Pickup Success Behaviors (PSB): Measurement of successful visits to all pickup stops on Delivery Associates itinerary on a given day. This metric is calculated both on DA and DSP level as a defect per 100 opportunities and have 5% weight on the overall Scorecard. We define a successful visit as any visit to a routed address (stop) that has a package scan event at the pickup location (scanned or manually entered) OR any failure event (exception) within time constraints and distance constraints. In cases where a DSP has fewer than 10 stops but is performing at a Fantastic level, their PSB metric performance will be shown as Fantastic. However, if a DSP has fewer than 10 stops and is performing below the Fantastic level, their PSB metric will not be calculated, and instead, it will be marked as "Coming Soon".

Team

<i>i</i> High Performers Share: The number of DAs that achieved Fantastic as an overall performance tier in 4 (or more) of the past 6 weeks, divided by the total number of DAs that have delivered for 4 (or more) of the past 6 weeks. DSPs who earn Fantastic for High Performers Share typically achieve 75% or better (i.e. 75% of DAs earned Fantastic tier in 4 or more of the past 6 weeks).	5.0%
<i>i</i> Low Performers Share: The number of DAs that achieved Fair or Poor as an overall performance tier in 4 (or more) of the past 6 weeks divided by the total number of DAs which have delivered for 4 (or more) of the past 6 weeks. DSPs who earn Fantastic for Low Performers Share typically achieve 0.0% for the metric.	5.0%
<i>i</i> Tenured Workforce: The percent share of Delivery Associates (DAs) with an attempted delivery in the week who have a tenure of at least 30 completed workdays. Completed workdays are calculated as the cumulative count of distinct dates with an attempted delivery. Tenured Workforce rate of 90% or higher is rated 'Fantastic'.	5.0%

Learn More: Metric Weighting Methodology

Your Overall Standing is designed to reflect your holistic success as a Delivery Service Partner. It is a weighted average of your Safety & Compliance, Reliability, Team, and Quality scores (except when you don't have a Safety score). Each of these four category-level scores are in turn weighted averages of the metrics within them, e.g. your Team score is a weighted average of High Performers Share, Low Performers Share, & Tenured Workforce. If a metric has sub-metrics then it is an equally-weighted average of its sub-metrics (unless otherwise noted); e.g. Standard Work Compliance is a weighted average of POD, Contact Compliance, and AD Accuracy scores. All "Coming Soon" metrics are not considered in the roll-up, and in such cases metric weights are re-adjusted accordingly.

Two additional notes: 1) You can only achieve an Overall Standing less than or equal to your Safety and Compliance score. 2) Incurrence of a 30-Day Noncompliance Notice automatically makes your Overall Standing "Poor" while the notice is in effect.
